Skills

JavaScript, Python, React.js, Redux, PostgreSQL, Node.js, Flask, HTML5, CSS3, SQL, Express, Git, Adobe Photoshop, Adobe Indesign, Render

Projects

Inkling

[Live Site](#) | [GitHub](#)

JavaScript · Python · React / Redux · Flask · PostgreSQL · HTML5 · CSS3

A note-taking app with rich text editing, print, dark-mode.

- Leveraged the power of React Hooks and event handling to create real-time autosave feature.
- Built interface with highly customizable note formatting and API with full CRUD functionality.
- Implemented modern site-wide light and dark mode switching functionality using CSS3.

Recollecting Dairy

[Live Site](#) | [GitHub](#)

JavaScript · Python · React / Redux · Flask · PostgreSQL · HTML5 · CSS3

Popular to-do list app, Remember the Milk, clone.

- Collaborated with 2 developers using Git version control & code review processes to meet project milestones.
- Developed a parsing function to extract tag characters from a single input field for populating back-end forms.
- Designed front-end architecture to use dynamic rendering techniques for maximum efficiency.

AirBnB Clone

[Live Site](#) | [GitHub](#)

JavaScript · React.js · Redux.js · Express.js · Sequelize.js · HTML5 · CSS3

App for renting out properties and finding places to stay.

- Built entire front-end and back-end solutions and joint integration.
- Implemented state management techniques for seamless user interface functionality.
- Minimized back-end redundancy by employing helper functions.
